

**Extreme drilling depth with CarbideMax Extra Long.**

For the most extreme drilling depths the CarbideMax range offers 150mm & 200mm extra long broach cutters.

With precision drilling flutes and a specially engineered geometry for accurate cutting these cutters come with a standard 19.05mm Weldon shank for use in any magnet drill with sufficient stroke.

**Drill matching holes through box or H section in a single pass**

Part No	D Ø mm
108050-0180	18mm
108050-0200	20mm
108050-0220	22mm
108050-0240	24mm
108050-0260	26mm
108050-0300	30mm
108050-0320	32mm
108050-0330	33mm
108050-0360	36mm
108050-0390	39mm
108050-0420	42mm
108050-0450	45mm
108050-0500	50mm

**Pilot Pins**

Part No	Dia Ø	Length	Unit of sale
108050P-0600-2P	7.98	255	Pack 2

Used when drilling material greater than 50mm thick. When the pilot pin reaches the extent to which it can retract inside the magnet drill arbor, the bottom section of the pilot can be removed to allow the hole to be completed without removing the pilot pin from the cutter.
